Sprint 1	US#1	3	As a user, I want to register so I can create an account	1. User navigates to the registration page. 2. User enters required information (email and password). 3. User submits the registration form. 4. System validates the input data. 5. If the data is valid, the account is created successfully. 6. User is redirected to the login page. 7. If the data is invalid, an error message is displayed and the account is not created.	High	Medium	Done	Friday Feb 6th 2026
Sprint 1	US#2	3	As a user, I want to log in so I can access my profile	1. User navigates to the login page. 2. User enters registered email and password. 3. User submits the login form. 4. System verifies the credentials. 5. If credentials are correct, user is logged in successfully. 6. User is redirected to their dashboard. 7. If credentials are incorrect, an error message is displayed and access is denied.	High	Medium	Done	Friday Feb 6th 2026
Sprint 1	US#3	3	As a user, I want to manage my profile preferences	1. User logs into the system. 2. User navigates to the profile management page. 3. User views current profile preferences. 4. User updates one or more preferences. 5. User saves the changes. 6. System validates and stores the updated preferences. 7. System confirms that the preferences were updated successfully.	Medium	Medium	Done	Friday Feb 6th 2026
Sprint 2	US#4	5	As a user, I want to create recipes with ingredients, preparation steps, time, cost, and dietary tags, so that I can save and reuse my own recipes.	1. User logs into the system. 2. User navigates to the recipe creation page. 3. User enters recipe details including ingredients, preparation steps, preparation time, cost, and dietary tags. 4. User submits the recipe form. 5. System validates the entered recipe information. 6. If the data is valid, the recipe is saved successfully. 7. System displays a confirmation message and adds the recipe to the user's recipe list. 8. If the data is invalid, an error message is displayed and the recipe is not saved.	Medium	Medium	Done	Friday Feb 27th 2026
Sprint 2	US#5	3	As a user, I want to edit an existing recipe, so that I can update recipe details when needed.	1. User logs into the system. 2. User navigates to their list of saved recipes. 3. User selects a recipe to edit. 4. System displays the current recipe details. 5. User modifies one or more recipe fields. 6. User saves the updated recipe. 7. System validates and stores the updated recipe information. 8. System confirms that the recipe was updated successfully.	Medium	Low	Done	Friday Feb 27th 2026
Sprint 2	US#6	2	As a user, I want to delete recipes I no longer want, so that my recipe list stays organized.	1. User logs into the system. 2. User navigates to their recipe list. 3. User selects a recipe to delete. 4. System prompts the user for deletion confirmation. 5. User confirms the deletion. 6. System removes the recipe from the database. 7. System updates the recipe list and confirms successful deletion.	Low	Low	Done	Friday Feb 27th 2026
Sprint 2	US#7	3	As a user, I want to search recipes by name or ingredient, so that I can quickly find specific recipes.	1. User logs into the system. 2. User navigates to the recipe browsing page. 3. User enters a recipe name or ingredient in the search bar. 4. User submits the search request. 5. System searches the recipe database based on the input criteria. 6. System displays a list of matching recipes. 7. If no results are found, the system displays an appropriate message.	Medium	Medium	Done	Friday Feb 27th 2026
Sprint 2	US#8	5	As a user, I want to filter recipes by time, difficulty, cost, or dietary tags, so that I can easily find recipes that match my preferences.	1. User logs into the system. 2. User navigates to the recipe browsing page. 3. User selects one or more filter options (time, difficulty, cost, dietary tags). 4. User applies the selected filters. 5. System filters the recipes based on the chosen criteria. 6. System displays the filtered list of recipes. 7. User can modify or clear filters to update the results.	Medium	Medium	Done	Friday Feb 27th 2026
Sprint 3	US#9	5	As a user, I want to create a weekly meal plan, so that I can organize my meals for the entire week.	1. User logs into the system. 2. User navigates to the weekly meal planner page. 3. User creates a weekly meal plan. 4. System initializes an empty weekly planner grid. 5. System displays the planner to the user.	Medium	High	Done	Friday March 27th 2026
Sprint 3	US#10	5	As a user, I want to assign a recipe to a specific day and meal type, so that my weekly plan is organized.	1. User logs into the system. 2. User navigates to the weekly meal planner page. 3. System retrieves the weekly meal plan. 4. System displays the planner in a grid format showing days and meal types.	Medium	High	Done	Friday March 27th 2026
Sprint 3	US#11	3	As a user, I want to edit or remove meals from my weekly planner, so that I can update my plan when needed.	1. User logs into the system. 2. User navigates to the weekly meal planner page. 3. User selects a planned meal. 4. User edits or removes the meal. 5. System updates the weekly planner.	Medium	Medium	Done	Friday March 27th 2026
Sprint 3	US#12	3	As a user, I want the system to prevent duplicate recipes in the same week, so that my meal plan remains varied.	1. User logs into the system. 2. User navigates to the weekly meal planner page. 3. User attempts to assign a recipe to a slot that already contains a meal. 4. System detects the duplicate assignment. 5. System prevents the action and notifies the user.	Medium	High	Done	Friday March 27th 2026
Sprint 3	US#13	3	As a user, I want to watch a video tutorial for a recipe so that I can visually learn how to prepare the dish.	1. User logs into the system. 2. User navigates to the recipes page. 3. User clicks on a recipe card. 4. System displays the recipe details in a modal. 5. System displays a "Watch Tutorial" button in the recipe modal. 6. User clicks the "Watch Tutorial" button. 7. System redirects the user to a YouTube search page using the recipe name.	Medium	Medium	Done	Friday March 27th 2026

Sprint 3	US#14	3	As a user, I want to see a curated list of video tutorials inside the recipe modal so that I can choose the most helpful one without leaving the app.	1. User opens a recipe modal. 2. System fetches up to 5 YouTube results for the recipe name via the YouTube Data API. 3. A scrollable horizontal video card strip is shown below the recipe details. 4. Each card shows a thumbnail, channel name, and video duration. 5. User clicks a video card – it expands inline as an embedded player. 6. User can collapse the player and select a different video.	Medium	Medium	Done	Friday March 27th 2026
Sprint 3	US#15	2	As a logged-in user, I want to bookmark a tutorial video so that I can re-watch it later without having to search again.	1. User opens the recipe modal and views the video strip. 2. Each video card has a bookmark icon button. 3. User clicks the bookmark icon and the system saves the video URL and recipe ID to their profile. 4. Icon fills to indicate a saved state. A notification confirms "Video saved." 5. User can access all saved videos under Profile → Saved Tutorials. 6. User can remove a bookmark from either the recipe modal or the saved list.	Medium	Low	Done	Friday March 27th 2026
Sprint 3	US#16	1	As a user, I want a dedicated tutorial page for a recipe so that I can follow along on a larger screen while cooking, without modal distractions.	1. User clicks "Open full tutorial" from the recipe modal. 2. System navigates to /recipes/id/tutorial – a standalone page OR system navigates to youtube. 3. Page shows the recipe name, a large embedded video player, and a collapsible ingredient checklist on the side. 4. User can tick off ingredients as they cook, without losing their video position. 5. A "Back to recipe" breadcrumb link returns them to the modal context. 6. Page is responsive – on mobile, the checklist moves below the video.	Medium	Low	Done	Friday March 27th 2026
