

Issue #	Task #	Associated User Story	Task Title	Task Description	Priority	Risk	Responsible	Dependencies	Status
34	4.1	US#4	Design recipe data model	Requirements: - Define recipe structure (name, ingredients, preparation steps, preparation time, cost, dietary tags) - Ensure recipe can be associated with a user - Store recipe data in JSON file	Medium	Medium	Chrisjan Alejandro	None	Done
35	4.2	US#4	Create recipe creation UI	Requirements: - Form fields for recipe name, ingredients, steps, time, cost, dietary tags - Submit button - Basic validation (required fields must be filled)*	Medium	Low	Martin Miskovski	None	Done
36	4.3	US#4	Implement recipe creation backend	Requirements: - Backend route to handle recipe creation - Validate incoming recipe data - Save recipe to JSON file if valid*	Medium	High	Chrisjan Alejandro	#4.1	Done
37	4.4	US#4	Display recipe creation feedback	Requirements: - Display success message when recipe is created - Display error message if validation fails	Low	Low	Chrisjan Alejandro	#4.1, #4.2 and #4.3	Done
38	5.1	US#5	Add edit option to recipe list	Requirements: - Display edit button next to each recipe - Only allow editing of user's own recipes	Medium	Low	Ethan Elkaim	None	Done
39	5.2	US#5	Load recipe data into edit form	Requirements: - Pre-fill edit form with existing recipe data - Allow user to modify fields*	Medium	Medium	Kadio Paul-Philippe Ehui	#4.1	Done
40	5.3	US#5	Implement recipe update backend	Requirements: - Backend route to update existing recipes - Validate updated data - Save changes to JSON file	Medium	High	Kadio Paul-Philippe Ehui	#5.1 and #5.2	Done
41	5.4	US#5	Display recipe update confirmation	Requirements: - Show confirmation message after successful update	Low	Low	Kadio Paul-Philippe Ehui	#5.1, #5.2 and #5.3	Done
42	6.1	US#6	Add delete option to recipe list	Requirements: - Display delete button for each recipe - Only allow deletion of user's own recipes	Low	Low	Ethan Elkaim	None	Done
43	6.2	US#6	Implement deletion confirmation	Requirements: - Prompt user to confirm before deleting a recipe	Low	Low	Ethan Elkaim	#6.1	Done
44	6.3	US#6	Implement recipe deletion backend	Requirements: - Backend route to delete recipe - Remove recipe from JSON file	Medium	Medium	Ethan Elkaim	#4.1	Done
45	6.4	US#6	Refresh recipe list after deletion	Requirements: - Update UI to reflect deleted recipe - Display deletion confirmation message	Low	Low	Ethan Elkaim	#6.3	Done
46	7.1	US#7	Add search bar UI	Requirements: - Search input field on recipe page - Allow searching by recipe name or ingredient	Medium	Low	Martin Miskovski	None	Done
47	7.2	US#7	Implement recipe search backend	Requirements: - Backend logic to search recipes by name or ingredient - Return matching results	Medium	Medium	Marc Urbano	#4.1	Done
48	7.3	US#7	Display search results	Requirements: - Display matching recipes - Show message if no results found	Low	Low	Marc Urbano	#7.1 and #7.2	Done
49	8.1	US#8	Add filter UI controls	Requirements: - Filter options for time, difficulty, cost, dietary tags	Medium	Low	Martin Miskovski	None	Done
50	8.2	US#8	Implement recipe filtering backend	Requirements: - Backend logic to filter recipes based on selected criteria	Medium	High	Kepler Paul-Emile	#4.1	Done
51	8.3	US#8	Display filtered recipe results	Requirements: - Update recipe list based on applied filters - Allow clearing or modifying filters	Low	Low	Kepler Paul-Emile	#8.1 and #8.2	Done
